

**50 GOOD
IDEAS FOR
EVIDENCE
BASED
NURSING
PAPER**

1. The future of asthma education on a culturally sensitive community
2. Effects of Horticultural therapy for mental health residential treatment
3. Adults dealing with lateral patellar dislocations and instability
4. Spinal Cord Injury: Its effects on young adults
5. Behavioural Interventions of eating disorders
6. Urinary tract infection on children and the possibility of its reoccurrence
7. Neuroprosthesis for the enhancement of walking speed
8. Patients with general anaesthesia: A review
9. Impacts of media exposure on toddlers
10. Strategies and methods on pediatric postoperative pain
11. Chlorhexidine Gluconate in Critical Care Settings
12. Improving nurse shift report for improved patient satisfaction
13. Electrical Simulation effects while cycling to treat spinal cord injury
14. A conservative management on lateral patellar dislocations
15. A careful study on leg-calve-Perthes disease in children aging 3 to 12 years old

16. A guideline to an efficient anti-infective treatment for Community-acquired pneumonia
17. An assessment of young women suffering from heavy menstrual bleeding
18. Wound care assessment for diabetic patients
19. A simple ulcer that may lead to cancer
20. Chronic schizophrenia: Treating it through social skills group training sessions
21. Heparin injections: The extent of its side effects
22. Studying the pain coming out of anaesthesia
23. The effectiveness of taking Vitamin C to prevent flu
24. Zinc pills to prevent colds during the winter season
25. A study on tube feedings to infants
26. Positions that women on labour should use for a better delivery
27. An assessment on matters learned in nursing school
28. Theories learned in nursing school: Are they applied in practice
29. The present situations of ICUs in hospitals found in the rural area
30. Nosocomial pneumonia leading to complications
31. Ways on how to prevent teenage pregnancy

32. What needs to be disseminated during health care education programs and seminars for STI prevention
33. Routine vaccinations on children
34. NCLEX: when should you perfectly take it
35. An assessment of the competence of NCLEX
36. The developments of cancer treatment
37. Studying pain diaries of patients with cancer
38. How nurses manage their own hygiene during their shifts
39. Antibacterial foam dispensers effectiveness compared to simple washing of hands with water and soap in nursing units
40. Effects of bedside shift report on a busy med-surge unit
41. A study on presurgical home visits done by a specialist cardiac nurse
42. Monitoring the effects of obesity on children and adolescents
43. Skin breakdown and diseases prevalent today
44. Psychosocial support given by nurses to boost the confidence of patients and families
45. A thorough research on hemopoietic stem cell transplant
46. Effects of oral contraceptives specifically on weight gain
47. Type I Diabetes: Why should you be alarmed

48. Antifungal Treatment that can be done at home

49. Quality of nursing service to the elderly in rural areas

50. Immunotherapy extracts in an outpatient setting
